PROFESSIONAL SUMMARY

Software Engineering student seeking an **internship opportunity in Software Development**, with strong interest in hands-on learning, technical growth, and participation in real-world projects.

I have a solid foundation in web development, with knowledge of **JavaScript, HTML5, CSS3, Node.js, Java, and SQL**, acquired through academic and personal projects. I have experience building front-end interfaces, developing and consuming REST APIs, designing relational databases, and using Git/GitHub for version control.

I am proactive, collaborative, and strongly oriented toward continuous learning, with the ability to quickly absorb new concepts, follow best development practices, and contribute positively within team environments.

TECHNICAL SKILLS

- JavaScript
- HTML5 | CSS3
- Front-end Web Development
- Node.js
- REST APIs (GET, POST, PUT, DELETE)
- SQL Databases (MySQL, SQL Server, Oracle)
- Java
- Object-Oriented Programming (OOP)

- Git | GitHub
- Programming Logic

EXPERIENCE

Developer in Training | Freelancer | Self-Employed

Academic and Personal Projects

Jan/2024 – Present

- Developed complete web applications with a focus on usability, centralizing user information into simple and well-structured interfaces
- Built front-end interfaces using HTML5, CSS3, and JavaScript, prioritizing intuitive navigation and user experience
- Developed and consumed REST APIs using Java and Node.js, implementing CRUD operations (GET, POST, PUT, DELETE)
- Designed and used SQL databases for dynamic data storage and manipulation
- Developed a sports management dashboard for team organization, expense tracking, and athlete management
- Used Git and GitHub for version control, code management, and project organization

PROJECTS

Full Stack Web Portfolio

- Complete development of the application
- Single-page interface focused on usability
- Technologies: HTML5, CSS3, JavaScript, Git/GitHub

Dashboard Fut 360

- Sports management system for controlling athletes, matches, and expenses
- Back-end developed in Java with SQL database
- Creation of REST APIs for data manipulation
- Application of OOP concepts and data modeling

Casino Project (C)

- Academic project focused on programming logic and code structure

EDUCATION

Bachelor's Degree in Software Engineering

PUC Campinas – SP, Brazil

Jan/2024 – Dec/2027 (In progress)

COURSES & ADDITIONAL KNOWLEDGE

- Web Development (HTML5, CSS3, JavaScript, Node.js)
- Databases (MySQL, Oracle SQL, SQL Server)
- Object-Oriented Programming (Java, Python, C, Kotlin)
- Version Control (Git/GitHub)
- Information Security and LGPD

LANGUAGES

- **Portuguese:** Fluent
- **English:** Advanced
