PROFESSIONAL SUMMARY

Software Engineering student seeking an international or remote internship in Software Development, with a strong interest in hands-on learning, technical growth, and contributing to real-world projects in collaborative, distributed teams. I have knowledge of web development, REST APIs, relational databases, and object-oriented programming, with experience in JavaScript, Python, Java, Node.js, SQL, Git, and GitHub, gained through academic and freelance projects. Proactive, well-organized, and driven by continuous learning, comfortable with remote work, team communication, and adapting to new technologies.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), Python, Java, SQL
Front-end	HTML5, CSS3, Front-end Web Development
Back-end & APIs	Node.js, REST APIs, CRUD operations
Databases	MySQL, Oracle SQL, SQL Server, relational modeling
Data & Geo	GeoPandas, Pandas, NumPy, SciPy, Matplotlib, ReportLab
Concepts	OOP, programming logic, Git, GitHub

EXPERIENCE

Freelance Developer — Aldino Project · Geospatial Analysis

Feb 2025 – Project completion

Remote

- Developed a **geospatial system in Python** for processing multidimensional urban data.
- Implemented **spatial analyses** (ESDA, Moran's I, Local LISA) and **spatial interpolation** (Kriging, IDW, and GWR regression).
- Automated the generation of **50+ analytical visualizations and technical PDF reports**.
- Stack:** Python, GeoPandas, Pandas, NumPy, SciPy, Matplotlib, ReportLab, Git.

Developer in Training — Freelancer / Self-Employed

Jan 2024 – Present

Academic & Personal Projects · Remote

- Developed **complete web applications** focused on organization, usability, and responsiveness.
- Built **front-end interfaces** with HTML5, CSS3, and JavaScript, and developed/consumed **REST APIs** with Java and Node.js.
- Modeled **relational databases** in SQL and used Git/GitHub for version control and collaboration.

PROJECTS

Geospatial Analysis System — Aldino Project

Tech: Python, GeoPandas, Pandas, NumPy, SciPy, Matplotlib, ReportLab, ESDA, PyKriging, Git

- Advanced geospatial analysis with spatial statistics, geographic interpolation, and automated technical PDF reporting.

Dashboard Fut 360

Tech: Java, SQL, REST APIs, OOP

- Sports management system for tracking athletes, matches, and expenses, with a Java back-end, SQL database, and REST APIs.

Full Stack Web Portfolio

Tech: HTML5, CSS3, JavaScript, Git/GitHub

- Complete single-page application focused on usability and clean design.

EDUCATION

Bachelor's Degree in Software Engineering · PUC Campinas – Brazil

Jan 2024 – Dec 2027 · In progress

International High School · Lassen High School – California, USA

Jun 2022 – Jun 2023

COURSES & KNOWLEDGE

- Web Development** — HTML5, CSS3, JavaScript, Node.js
- Databases** — MySQL, Oracle SQL, SQL Server
- OOP** — Java, Python, C, Kotlin
- Version Control** — Git/GitHub · **Security & LGPD**
